Cut out the rectangular monster section below and then cut out the white mouth and stomach areas.

Fold along the dotted lines. Use glue to secure the grey ends. You'll have a tripod shape with holes for the mouth and stomach. Place a small cup or bowl on the inside to prevent it from toppling and to collect the cookies. You can choose to use a clear plastic sheet to cover the stomach area and create a window, but that's optional!

Cut out the cookies on the next page and spread them out on the table in front of the monster.

Use a monster voice to tell your child what alphabet or number the monster wants to eat. Have your child search for the number/alphabet cookie you asked for and feed it to the monster. Watch monster's tummy fill up with yummy cookies! Use the blank cookies to make up your own game!
